SUPER MARIO 64

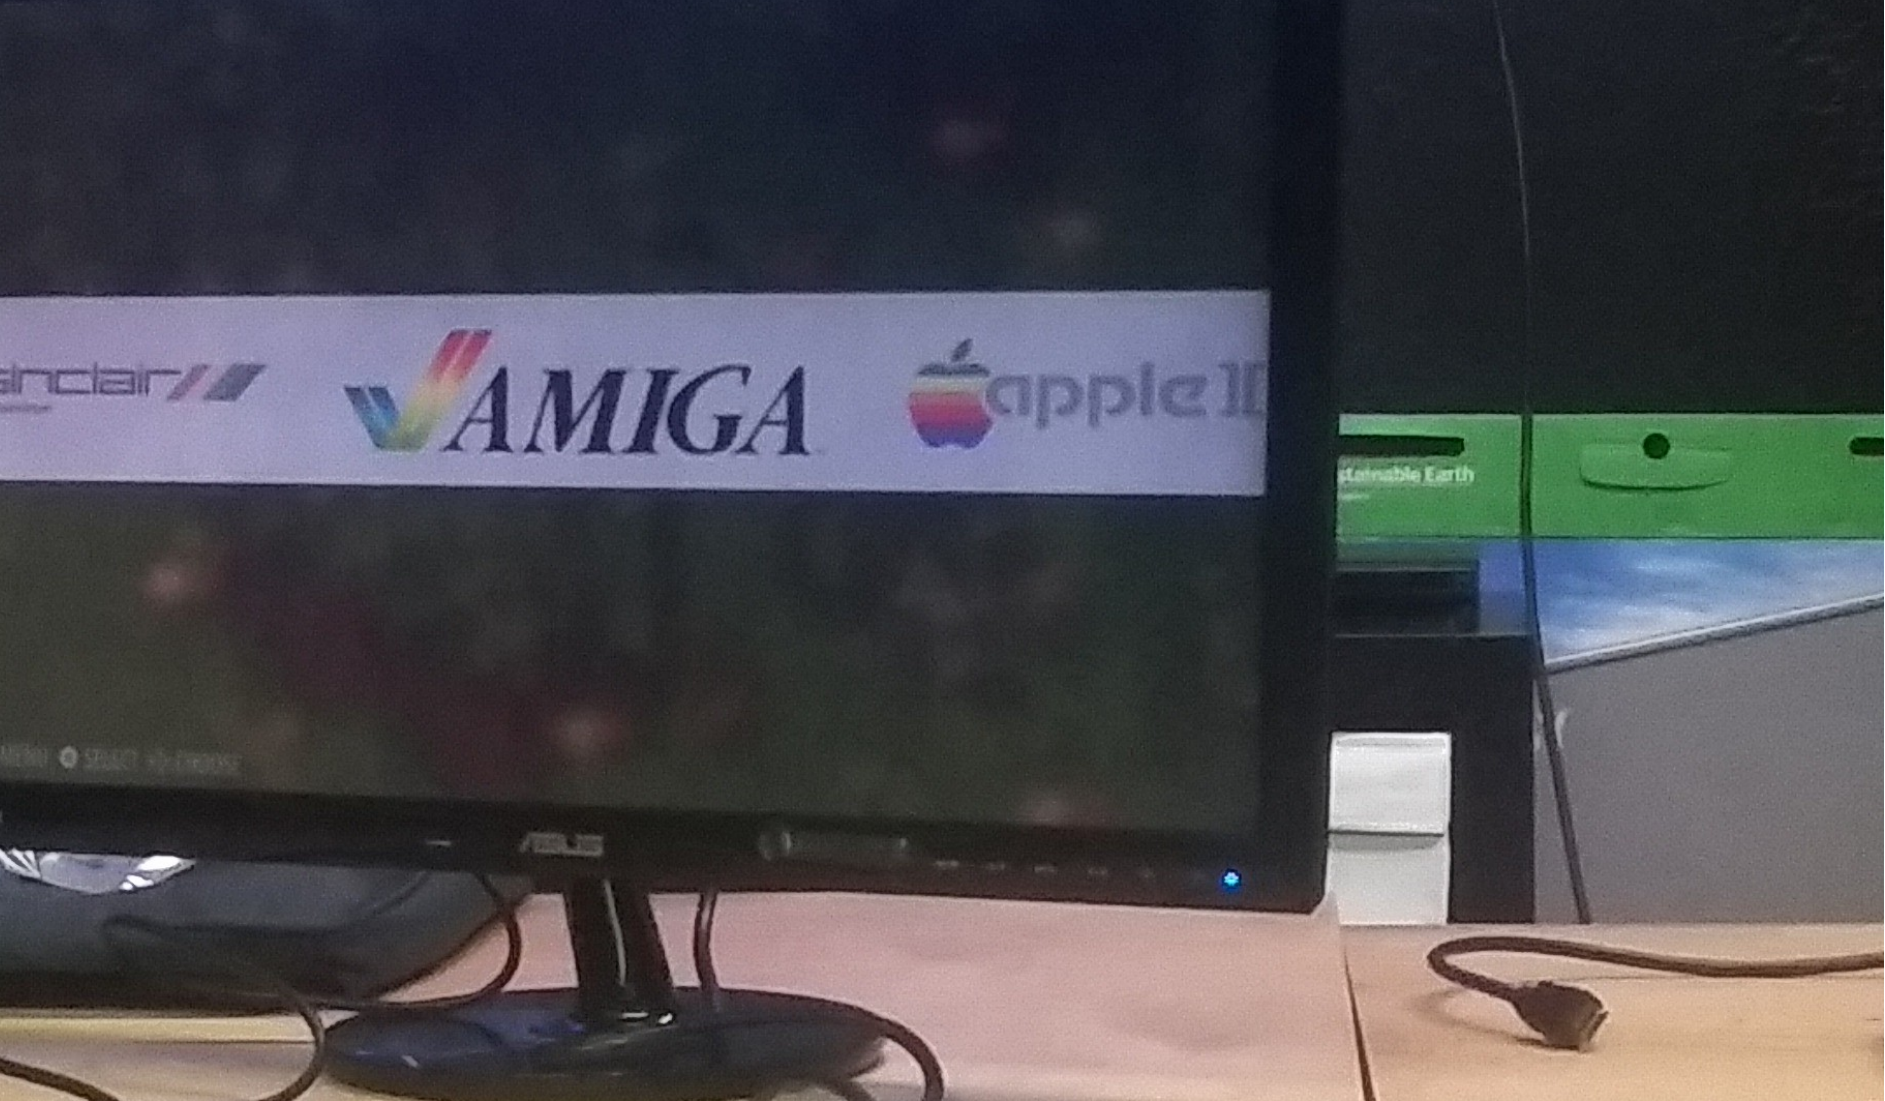

SUPER MARIO 64

- day we got Rudy's Lapdock working!
- 
- 
- 
- At first, it seemed like the lapdock wouldn't power on.
- 
- We checked the power cord with the multimeter and the power cord worked. So, Rudy did some research and tada!!!!
- 
- Then, he reset it. He did a reset and a power on at the same time to get it to work. He says you may need to do it a couple times.
- 
- 15 - 2
- 
- We now have a few different keyboard options. One has a trackball that works. When we wanted to see if the trackball works, Alex said he'd give it a whirl.
